Georgia Crop Improvement Association Organic Certification Program

Field History Record

PLEASE NOTE: All documents submitted must be typed. Hand written documents will not be accepted.

The purpose of this form is to document that land used to produce organically certified products meets the National Organic Program standards. Pertinent NOP rules include: 205.202 land requirements. Any field or farm parcel from which harvested crops are intended to be sold, labeled, or represented as "organic" must: (a) Have been managed in accordance with the provisions of **§205.203 through §205.206;** (b) Have had no prohibited substances, as listed in **§205.105,** applied to it for a period of 3 years immediately preceding harvest of the crop: and (c) have distinct, defined boundaries and buffer zones such as runoff diversions to prevent the unintended application of a prohibited substance applied to adjoining land that is not under organic management.

Complete this form for **EACH** field (organic, transitional & conventional). Inputs that have already been applied must include the rate and date of application unless you are keeping separate input records. Keep copies for your files. This record should accompany your CROP Organic System Plan Summary.
