Required Documentation :

Transaction Certificate (TC)

- A Transaction Certificate (TC) is a voluntary certificate that guarantees the organic status of a specific lot or shipment. These can be international or domestic and can guarantee organic compliance with various standards based on the client's request.

Cover Sheet

Coversheets are necessary for each export certificate request. There are a few reasons for this. The first is that without the coversheet, we do not know how to process or where to send the certificate.

Corroborating Documentation to verify the Shipment (e.g. Bill of Lading or Invoice)
Documentation must accompany the transaction documentation which corroborates the information in the certificate, such as name of product being shipped, by whom it is shipped, to whom it is shipped, weight, lot numbers, container numbers and other identifying information.
