

## Georgia Crop Improvement Association Organic Certification Program

### Greenhouse Materials Input Inventory

Instructions: List all crop input materials used for soil fertility, crop nutrient, weed, pest and disease control in the table below. Indicate that it is an allowable material by checking the appropriate box. **PLEASE NOTE: All documents submitted must be typed. Hand written documents will not be accepted.**

|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |
|                     |                      |                                               |                         |                |               |                |                                       |

If restricted materials used, describe use restrictions the applicant will follow. Attach additional supporting documents as needed. \_\_\_\_\_

By signing, I attest that I understand the applicable use restrictions to any inputs listed as restricted.

If micronutrients are applied, provide annual soil test reports which justify such use per 205.601(J)7 & 205.601(I)1-11.

Include certificates for all inputs (OMRI, WSDA, PCO).

Include labels for all materials found on the National List.
